***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The primary reasons for allowances of claims 1-52 is because, upon reconsideration, the claimed combinations are not taught by the art of record.

For example, with respect to claims 1, 13, 18, and 23, Usui (US 6561633 B2) teaches the adhesive flows, under a capillary force, between a frame 100 of a recording head and a fixing substrate 107 of a vibrating element unit 110, not between a carrier and a fluid ejecting substrate as claimed. Further Usui's arrangement is used to adhere the vibrating element unit 110 within the frame, not to adhere the fluid ejecting substrate to the carrier, as claimed.

Further, with respect to claim 27, Usui indicates in column 14, online 48-50, that an adhesive penetrating in a gap  $\Delta g$  is stopped by surface tension at an end of the gap. This is different from the claims in that the claimed combination recites using viscosity to control the flow of the multi-component fluid.

Further, with respect to claim 47, upon reconsideration, the examiner agrees with the applicant Usui does not show or mention a plurality of channels disposed in a surface of the fluid-ejecting substrate between electrical contacts of a fluid-ejecting substrate and a plurality of orifices in the surface of the fluid ejecting substrate, as claimed.

Hence, the independent claims are deemed to be allowed. The dependent claims are allowed since they depend from allowed base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
